

PERSONAL INFORMATION

Dr. Mate Bestek

 Ljubljana, Slovenia AND Paris, France

 0038631323100

 mate.bestek@gmail.com

 <https://www.linkedin.com/in/matebestek>

 <https://github.com/matebestek>

Sex Male | Date of birth 22/09/1981 | Nationality Slovene (Croatian by parents)

PERSONAL STATEMENT

Driven by curiosity, explorer of reality with a strong sense for people, technology and life sciences and the ability to listen, structure, innovate...but most importantly, finish what once started.

A highly creative person that enjoys connections in life – with people or concepts – that can be very diverse due to my inherent interdisciplinarity.

Also, I love to travel and becoming more sensitive for different cultures. My close family uses 5 languages to communicate so together with my love for music and art - this cultural diversity is a big part of who I am.

WORK EXPERIENCE

March 2024 - ongoing

Oncology Institute Ljubljana, Scientific Associate

My impact: Leading the cervical cancer screening information system R&D initiative – the project has gone to difficult stages since 2017 when it started until I took over – including the loss of the initial IT partner that was to develop the system as their product. We are now starting production use. I had to manage a lot of socio-technical complexity and find the path forward. A very risky project to take on but with my highly developed sense for healthcare, tech, and people I was able to manage change, mitigate risks, manage stakeholders etc.

In addition, I represent my organization in European networks focused on best practices on the use of AI in cancer screening. Internally, I lead initiatives on bringing AI into clinical and screening practice.

Research on cancer screening methods and programs – using methods of AI in cancer screening e.g. machine learning methods for missing data, synthetic data, use of LLMs for semantic search, use of LLMs together with screening registry data (RAG systems), agent development (image focus, data focus,) together with the “clinical agent” that is able to provide predicted next steps for women in terms of cervical cancer screening etc.

Academic publishing – information systems, implementation science

Innovating and establishing new partnerships and research projects – focus on AI

Key relationship management – focus on national eHealth, national Health Insurance Fund – due to multi-level experience including legal, data and technology aspects.

1 Nov 2020–Feb 2024

3fs for Getinge AB, Stockholm, Head of MedTech and Digital Healthcare

My impact: Helped Getinge to strategically define interoperability in their endeavour as an ICU medical device supplier to become more interoperable with the healthcare environments.

Vision, strategy and tactics – how to approach interoperability and how to make it part of all the product teams.

Business Development – participated in meetings with partners and competitors of Getinge.

Interoperability Vision, Strategy and Tactics consultant for MedTech

Product innovation for MedTech – defined interoperability as a product to reduce complexity

Expert on interoperability – design of solutions that interoperate with existing systems in hospitals and MedTech medical devices.

1 Nov 2019–1 Nov 2020

3fs digital product studio d.o.o., Digital Healthcare Expert

My impact: constant flow of innovation and expert knowledge made us a worthy expert with our clients.

Product innovation for large MedTech – PMCF (including EDC), synthetic data, tool for speeding up research and innovation with device data,

Expert on interoperability (IHE, OpenEHR) within healthcare environments – design of solutions that interoperate with existing systems in hospitals – HL7+IHE

Trends in Healthcare and MedTech

Management of R&D projects funded by different funds

1 Dec 2015–Oct 31 2019

Centre for Healthcare Informatics - national eHealth

National Institute of Public Health of Republic of Slovenia, Ljubljana (Slovenia)

My impact: the initial specifications I lead years earlier were now fully implemented national information systems.

A national expert on eHealth and Telemedicine - focus on interoperability - IHE, OpenEHR, SNOMED, Continua

Management of several national and European projects: (1) EkoSmart - healthcare as part of a smart city - a national pilot on new integrated care models that are part of a smart city platform (2) EU Joint Action on eHealth - nominated also as the national expert (3) CEF Funded project on cross-border exchange of health data (4) CEF Funded project SI-PASS - enabling cross-border eID and EIDAS directive (5) national EHR

Design, development, governance and analysis of common eHealth artefacts on the national level

Governance and analysis of eHealth Databases and Services

Cross-border exchange of patient data

Governance of the system for including existing solutions onto national eHealth level

Cooperating in national and international activities and bodies in the field of healthcare informatics

Tracking and cooperating with coordination of the information security governance system for healthcare informatics

Design and execution of communicating and educating about eHealth Services

Strategy development in the field of development and governance

Ensuring the availability of eHealth Services

International cooperation

23 Oct 2014–30 Nov 2015

Senior Government official - secretary, Subject Mater Expert and Project Manager on National eHealth Project

Ministry of Health of Republic of Slovenia, Ljubljana (Slovenia)

My impact: lead the project that brought the initial documents and specifications for the national information infrastructure to become real infrastructure on national level.

Direct aid with leading professional tasks of a part of the field of work of the ministry.

Managing relationships with external collaborators.

Leadership and participation in working groups.

Performing other most demanding tasks.

Participation in the preparation of strategies and annual planning.

Custody agreements in the field of applied solutions.

Keeping necessary records.

Preparing reports and reporting to management.

Cooperation with different sectors of the Ministry.

Managing subprojects of the National eHealth project.

Custody of the subject matter of the project - including OpenEHR, IHE etc.

1 Mar 2013–22 Oct 2014

Consulting on national and EU projects in the field of eHealth and Public Health

National Institute of Public Health, Ministry of Health of Republic of Slovenia, Ljubljana (Slovenia)

My impact: as the person who understood both healthcare and technology, I was able to help decrease risks associated with producing results in several national and European projects.

1. National eHealth project:

Worked on tender specifications according to the National project management methodology that is based on PRINCE2

Architecture and design with focus on different levels of interoperability - IHE, OpenEHR

2. European Joint Action project – PARENT:

Requirements analysis on an international level for the purpose of establishing a European patient registry network for exchanging registry data

Analysis of existing European projects and initiatives with the goal of reusing as much as possible

Analysis of national requirements with establishing patient registries

Architecture and selection of standards with the main focus on different levels of interoperability

Harmonization of the analysis and architecture with all the European partners on the project and external experts in the field

Used UML, BPMN2 and ArchiMate.

3. European Commission Large Scale Project – epSOS

Cross-border Exchange of Patient Data

National requirements for the Patient Summary Document

Used standards like HL7, IHE and OpenEHR for modelling clinical content

Established the National Contact Point software solution that communicated with the national ehealth infrastructure on one side and the National Contact Points of other EU Member states

Participated an IHE Connectathon with the NCP Solution

Supported also the epSOS participation of Croatia (similar tasks than in Slovenia)

1 Jul 2010–27 Feb 2013

Operational Project Manager, Chief architect and Lead Software Development Engineer

University of Primorska, Institute Andrej Marušič
Glagoljaška 8, 6000 Koper (Slovenija)

My impact: lead the projects and development efforts that included around 60 people. We were able to finish successfully despite many complexities of projects in healthcare especially when multiple countries are included.

Worked on different projects in the field of eHealth

1. National eCare project –

A research project that focused on development of an interoperability (IHE, OpenEHR) based platform and on the methodology of designing new behaviour change interventions for multiple target user groups (asthma, diabetes, schizophrenia, sports, obesity, depression).

2. Interregional project eHealth (Slovenia, Italy): -

Analysis of the current ICT state in 6 Slovenian Hospitals

Architecture (IHE, OpenEHR) of the infrastructure for exchanging patient data between hospitals in Slovenia and Italy.

Business or sector Education, Healthcare

1 Nov 2011–31 Dec 2012

Standards and technology adviser

Institute for Public Health of Republic of Slovenia

Trubarjeva 2, 1000 Ljubljana (Slovenija)

My impact: on-boarding Slovenia to the large scale epSOS project with my knowledge and expertise so that we became able to understand and participate in the project and to deliver results.

Working on the European Commissions epSOS project. In charge of interoperability, standards and technology. The national PRINCE2 methodology was used. Also, BPMN2 and other domain specific modeling approaches were used like IHE, HL7 v3 and OpenEHR.

Business or sector Public Health, Healthcare

1 Nov 2011–31 Jan 2012 Freelance Software Development Engineer

Iskratel d.d.

Ljubljanska cesta 24a, 1000 Ljubljana (Slovenija)

My impact: took over the project from my colleague who did not want to travel to Russia. Brought forward issues and potential solutions for the organization to be able to improve future solutions. Adapted to whatever was thrown at me.

Development of support for RTSP protocol into a set-top-box device that is based on open source XBMC media center solution in Moscow, Russia. The development included work with 4 different video on demand servers. Development was done using C and C++.

Business or sector Information and communication

1 Oct 2010–31 Oct 2011 Teaching assistant

University of Primorska, Faculty of Mathematics, Natural Sciences and Information Technologies (FAMNIT)

Glagoljaška 8, 6000 Koper (Slovenija)

My impact: learned about Active Directory to transfer knowledge to students and helped the organization to achieve results in spite the topic not being something I like or work with.

Microsoft Active Directory hands on seminar for students

Business or sector Education

1 Apr 2011–30 Sep 2011 Standards group lead

Ministry of Health of Republic of Slovenia

Štefanova 5, 1000 Ljubljana (Slovenija)

My impact: Based on my knowledge and expertise I defined the architecture of the national eHealth information infrastructure. The standards are still in use today.

National eHealth project in Slovenia. Working as a hired expert to work on the project. In charge of the standards related to healthcare (HL7, OpenEHR, CEN, IHE,...). Also used BPMN2 to model processes. Successfully used the OpenEHR methodology for the purpose of modelling clinical knowledge in 2 subprojects. Worked on the preparation of public tenders for the national IHE based infrastructure and other tenders of the national eHealth project. The methodology was based on PRINCE2.

1 Jan 2009–15 Jun 2010 Team Lead Software Development Engineer

Medius d.o.o., Tehnološki park 21, 1000 Ljubljana (Slovenija)

My impact: developed new systems that enabled convergence of the internet and telecommunications worlds. The public funding application was evaluated the best of all.

Presales activities.

Worked with customers on new project ideas and on POC projects.

Analysis, design and the implementation of systems.

Project documentation for state tenders.

In charge of building a new team in a new field of technology.

1 Apr 2007–31 Dec 2008

Team Lead Software Development Engineer

SRC.SI d.o.o., Tržaška cesta 116, 1000 Ljubljana (Slovenija)

My impact: lead a diverse team of engineers and students. The solutions we developed and managed obtained several recognitions for their quality and efficiency.

Software development engineer and team lead in the field of systems development for the government using java platform and open-source technology (e-uprava, evem).

Mentor to coworkers and a team lead to a team of 8 people.

Agile methodologies - Scrum and eXtreme Programming.

Oracle solutions: Oracle Database, Oracle Application Server, Oracle JDeveloper.

Managed 45 different deployments of systems.

Cooperation with Lotus Domino development team and the .NET development team.

Cooperation with other companies that worked with us on large scale integrations projects where interoperability was the key issue.

Gather requirements from customers.

Lead the initiative to implement agile methods into the organization.

17 Mar 2003–31 Mar 2007

Software Development Engineer

SRC.SI d.o.o.

Tržaška cesta 116, 1000 Ljubljana (Slovenija)

My impact: quickly gained knowledge and was able to actively contribute to the success stories in spite still being a student.

Developed systems in the field of G2C, G2B and G2G based on Java platform (JSE, JEE, JME).

Working on 15 different systems that are integrated together to form the concept e-government (eCitizen).

Developed innovative components that simplified the usage of PKI(Public Key Infrastructure) including digital signatures on the server side.

Developed components that simplified the problems involved with systems integrations.

The integration projects were based on the SOA architecture.

Developed web services based on the SOAP protocol, used enterprise integration design patterns
Developed web applications with struts and tiles; xml; xslt; xml schemas; axis for webservices; JEE, JSE, JME. Some development on the .NET platform (web services, gui). UML for different purposes: class diagrams, flow charts, deployment diagrams etc.

EDUCATION AND TRAINING

- 1 Jul 2017–31 Jan 2022 **PhD** EQF level 8
 IT University of Copenhagen, Copenhagen (Denmark)
 Democratizing Health Data Semantics – interdisciplinary thesis linking computer science and information systems, digital design and political economy.
- 1 Oct 2000–4 Apr 2007 **Bachelor of Science (BsC) – Computer and Information Science** 5A
 University of Ljubljana, Faculty of Computer and Information Science
 Tržaška cesta 25, 1000 Ljubljana (Slovenia)
 Computer Science
- 1 Sep 1996–31 Aug 2000 **Gimnazijski maturant**
 Gimnazija Ledina
 Resljeva cesta 12, 1000 Ljubljana (Slovenia)
 General upper secondary school

PERSONAL SKILLS

Mother tongue(s) Slovene

Foreign language(s)

	UNDERSTANDING		SPEAKING		WRITING
	Listening	Reading	Spoken interaction	Spoken production	
English	C2	C2	C2	C2	C2
German	A2	A2	A2	A2	A2
Macedonian	A1	A1	A1	A1	A1
French	A1	A1	A1	A1	A1
Croatian	C2	C2	C2	C2	C2

Levels: A1 and A2: Basic user - B1 and B2: Independent user - C1 and C2: Proficient user
 Common European Framework of Reference for Languages

Communication skills Excellent and respectful style of communication has always enabled me to build quality relationships and bring projects to successful ends.

Student of human behavior and attended business oriented leadership workshops

Organisational / managerial skills

Head of the Centre for Healthcare Informatics (35 people)

National coordinator for IT on the national cancer prevention programme

Lead the adoption of a national standard in the field of Healthcare; this includes excellent communication, organisation and management of resources

Lead teams of up to 60 people

Learning new languages – French daily

Job-related skills

Deep listening to what people have to say

Talk only if needed and have something important to say

Always aware of the bigger picture

Always ready to help people – as a mentor or just as a fellow human

Happy to share knowledge and help other people prosper, succeed and feel good about themselves

Digital skills

SELF-ASSESSMENT				
Information processing	Communication	Content creation	Safety	Problem-solving

35. BREGANT, Tina, MARGUČ, Karmen, CVIRN, Mojca, BEŠTEK, Mate, CUZAK, Gregor. Digitalna preobrazba zdravstva. Isis : glasilo Zdravniške zbornice Slovenije. [Tiskana izd.]. jun. 2021, leto 30, št. 7, str. 34-37, ilustr. ISSN 1318-0193. [COBISS.SI-ID 91410691]

Certifications

2026 – Health Technology Assessment Modeling with MISCAN

2024 – Health Technology Assessment Heidelberg University

2024 – Scientific Associate, Strokovni svet Onkološkega inštituta v Ljubljani

2024 – 5. Mariborski urgentni popoldne, UKC Maribor, Dr. Gregor Prosen

2024 – Use of generative AI with research work, EF

2024 – **Applied Good Clinical Practice** for Investigators and Site Personnel, European Forum for Good Clinical Practice, ASBL

2024 – Colposcopy course, Gynecological oncology Society of Slovenia

2022 - Advanced Leadership (Team Development), Hansen Beck

2018 - How to Make Strategic Thinking a Habit

2018 - Health Innovation in a changing society, from idea to implementation

2018 - Advanced Topics in Information Systems Theory

2018 - International Workshop on Participatory Health Informatics, Universidad de Sevilla

2018 - CASP Certified Advanced Security Practitioner, Housing Co. d.o.o.

2017 – IPR, Innovation and responsible conduct of research, IT University of Copenhagen

2017 - ITIL Foundation

2016 - IT Architect, Housing Co. d.o.o., Licence number 290/2016

2016 - KleHealthX: eHealth - Opportunities and Challenges, Karolinska Institutet, Credential ID 83cf0d82f1274ca287805c01c3f00f4a, No Expiration

2015 - Process Mining - Data Science in Action

2013 - Health Informatics in the Cloud, Georgia Institute of Technology

2009 - Sun Certified Web component Developer – SCWCD (2009)

2008 - Sun Certified Developer for Java Webservices - SCDJWS (2008)

2004 - Sun Certified Java Programmer (November 2004)
